

COMPANY OVERVIEW

Evolute LLC designs and delivers AI-enabled operational software that reduces manual effort, organizes complex information, strengthens repeatable processes, and improves visibility. We build focused systems around defined workflows and measurable outcomes.

CORE CAPABILITIES

AI Workflow Automation

Intake, routing, human review, exception handling, and next-action workflows.

Intelligent Document Processing

Ingestion, OCR, classification, extraction, summarization, chronology, and source-aware review.

Custom Operational Software

Purpose-built web applications, internal systems, dashboards, and integrations.

Compliance & Governance Automation

Workflow controls, audit support, evidence trails, document handling, and process enforcement.

Knowledge Management

Searchable repositories, retrieval systems, and governed organizational information.

Operational Dashboards

Real-time monitoring, reporting, analytics, alerting, and operational visibility.

OUTCOMES WE SUPPORT

- Reduced manual processing
- Faster information retrieval
- Consistent workflow execution
- Actionable exception visibility
- Human-reviewed AI outputs

DIFFERENTIATORS

- Small-business agility
- Rapid prototyping
- AI-first architecture
- Privacy-conscious design
- Direct founder involvement
- Low-overhead delivery model

DEMONSTRATED SOFTWARE CAPABILITIES

LexPacket	document ingestion, analysis, chronology, and structured extraction
Payroll AI	enterprise workflow automation, analysis, and exception intelligence
Evolute Presence	privacy-first occupancy sensing, dashboards, and facility analytics
VitalsDeck / ClipTyper	system monitoring and administrative productivity workflows

Products are presented as capability demonstrations and do not imply government past performance.
